Australia's Unintended Cities: The Impact of Housing on Urban Development

Australia's Unintended Cities identifies and researches housing and housing-related urban outcomes that are unintended consequences of other policies, the structure of incentives and disincentives for the housing market, and governance arrangements for metropolitan areas and planning and service delivery. It is argued that unintended consequences have a greater impact on the housing market and Australia's cities and their future than policies directly concerned with housing, urban policy and metropolitan strategic planning. The book will inform policy makers, including government officials, consultants and politicians. It will also be used by academics and students in various areas of urban policy, such as housing and urban planning, as well as environment, public policy and economics.
