**Scripting Cultures: Architectural Design and Programming (Architectural Design Primer)** Mark Burry

With scripting, computer programming becomes integral to the digital design process. It provides unique opportunities for innovation, enabling the designer to customise the software around their own predilections and modes of working. It liberates the designer by automating many routine aspects and repetitive activities of the design process, freeing-up the designer to spend more time on design thinking. Software that is modified through scripting offers a range of speculations that are not possible using the software only as the manufacturers intended it to be used. There are also significant economic benefits to automating routines and coupling them with emerging digital fabrication technologies, as time is saved at the front-end and new file-to-factory protocols can be taken advantage of. Most significantly perhaps, scripting as a computing program overlay enables the tool user (designer) to become the new tool maker (software engineer). Though scripting is not new to design, it is only recently that it has started to be regarded as integral to the designer's skill set rather than a technical speciality. Many designers are now aware of its potential, but remain hesitant. This book treats scripting not only as a technical challenge, requiring clear description, guidance and training, but also, and more crucially, answers the question as to why designers should script in the first place, and what the cultural and theoretical implications are.

This book:

- Investigates the application of scripting for productivity, experimentation and design speculation.
- Offers detailed exploration of the scripting of Gaudí's final realised design for the Sagrada Família, leading to file-to-factory digital fabrication.
- Features projects and commentary from over 30 contemporary scripting leaders, including Evan Douglass, Marc Fornes, Sawako Kaijima, Achim Menges, Neri Oxman, Casey Reas and Hugh Whitehead of Foster + Partners.

### **From reader reviews:**

#### **Whitney Martinez:**

The book Scripting Cultures: Architectural Design and Programming (Architectural Design Primer) gives you the sense of being enjoy for your spare time. You should use to make your capable a lot more increase. Book can to be your best friend when you getting pressure or having big problem with the subject. If you can make looking at a book Scripting Cultures: Architectural Design and Programming (Architectural Design Primer) to get your habit, you can get more advantages, like add your own personal capable, increase your knowledge about several or all subjects. You could know everything if you like available and read a publication Scripting Cultures: Architectural Design and Programming (Architectural Design Primer). Kinds of book are several. It means that, science book or encyclopedia or other individuals. So , how do you think about this guide?

#### **Lynnette Jennings:**

As people who live in typically the modest era should be update about what going on or info even knowledge to make these people keep up with the era that is certainly always change and advance. Some of you maybe can update themselves by examining books. It is a good choice for you personally but the problems coming to anyone is you don't know which you should start with. This Scripting Cultures: Architectural Design and Programming (Architectural Design Primer) is our recommendation so you keep up with the world. Why, since this book serves what you want and need in this era.

#### **Irene Gamino:**

That reserve can make you to feel relax. This book Scripting Cultures: Architectural Design and Programming (Architectural Design Primer) was colourful and of course has pictures around. As we know that book Scripting Cultures: Architectural Design and Programming (Architectural Design Primer) has many kinds or style. Start from kids until adolescents. For example Naruto or Investigation company Conan you can read and think you are the character on there. So , not at all of book are generally make you bored, any it makes you feel happy, fun and loosen up. Try to choose the best book to suit your needs and try to like reading that.

#### **Thomas White:**

What is your hobby? Have you heard that will question when you got scholars? We believe that that problem was given by teacher to their students. Many kinds of hobby, Every individual has different hobby. And also you know that little person like reading or as studying become their hobby. You have to know that reading is very important and also book as to be the thing. Book is important thing to add you knowledge, except your current teacher or lecturer. You see good news or update about something by book. Different categories of books that can you take to be your object. One of them is actually Scripting Cultures: Architectural Design and Programming (Architectural Design Primer).
