Carbonate Reservoirs: Chapter 1. The Basic Nature of Carbonate Sediments and Sedimentation (Developments in Sedimentology) Clyde H. Moore, William J. Wade

The biological influence over the origin, distribution, composition, texture, and mineralogy of carbonate sediments is stressed. Environmental factors such as light, temperature, and water depth directly affect these biological processes. Abiotic carbonate precipitation is discussed. Three carbonate factories are identified: shallow water tropical; deep water mud mound; cool-water factory developed in high and low latitudes. Basic attributes of each factory are developed. The rimmed shelf and ramp facies models of the tropical factory are detailed with the Belize shelf and Middle East Abu Dhabi as examples. The facies tract of the mud mound factory is detailed and the Devonian Canning Basin used as an example. The role of sea-level changes and carbonate sedimentation in platform development is discussed. High sea-level carbonate sediment shedding combined with lowstand sediment starvation is opposite to what is seen in regions of siliciclastic sedimentation. The dominance and importance of the Dunham rock classification is stressed. Finally, lacustrine carbonates are discussed using the African rift lakes as modern examples and developing a simple model of continental rift lake carbonate sedimentation emphasizing potential source rock and reservoir facies. The Brazil Cretaceous subsalt play of the south Atlantic rift and the potential of its African counterpart are discussed.

From reader reviews:

Debbie Davis:

Have you spare time for any day? What do you do when you have far more or little spare time? Yes, you can choose the suitable activity with regard to spend your time. Any person spent their particular spare time to take a walk, shopping, or went to the actual Mall. How about open or maybe read a book called Carbonate Reservoirs: Chapter 1. The Basic Nature of Carbonate Sediments and Sedimentation (Developments in Sedimentology)? Maybe it is to be best activity for you. You recognize beside you can spend your time using your favorite's book, you can smarter than before. Do you agree with it has the opinion or you have other opinion?

Virginia Cherry:

This book untitled Carbonate Reservoirs: Chapter 1. The Basic Nature of Carbonate Sediments and Sedimentation (Developments in Sedimentology) to be one of several books that best seller in this year, that's because when you read this reserve you can get a lot of benefit in it. You will easily to buy that book in the book retail outlet or you can order it by way of online. The publisher of the book sells the e-book too. It makes you easier to read this book, as you can read this book in your Touch screen phone. So there is no reason to your account to past this e-book from your list.

Heather Wade:

Are you kind of hectic person, only have 10 or perhaps 15 minute in your time to upgrading your mind proficiency or thinking skill even analytical thinking? Then you are having problem with the book than can satisfy your short space of time to read it because this all time you only find reserve that need more time to be learn. Carbonate Reservoirs: Chapter 1. The Basic Nature of Carbonate Sediments and Sedimentation (Developments in Sedimentology) can be your answer since it can be read by a person who have those short free time problems.

Arthur McLaurin:

This Carbonate Reservoirs: Chapter 1. The Basic Nature of Carbonate Sediments and Sedimentation (Developments in Sedimentology) is new way for you who has fascination to look for some information as it relief your hunger info. Getting deeper you on it getting knowledge more you know or you who still having little digest in reading this Carbonate Reservoirs: Chapter 1. The Basic Nature of Carbonate Sediments and Sedimentation (Developments in Sedimentology) can be the light food for you personally because the information inside this book is easy to get through anyone. These books build itself in the form that is reachable by anyone, yes I mean in the e-book contact form. People who think that in e-book form make them feel drowsy even dizzy this e-book is the answer. So there is not any in reading a reserve especially this one. You can find actually looking for. It should be here for a person. So , don't miss that! Just read this e-book sort for your better life as well as knowledge.
