RF Measurements of Die and Packages (Artech House Microwave Library (Hardcover)) Scott A. Wartenberg

The explosion in the wireless industry, coupled with the higher frequencies in today's digital integrated circuits (Ic) has made vital the need for accurate Ic testing. This is the first book dedicated to the issues surrounding Rfic testing. An important resource for Rfic designers and high-frequency digital Ic designers, Ic test engineers, and Ic manufacturing test engineers, this ground breaking resource helps you perform high-accuracy Rf measurements of die and packages in the Rf test lab, employ Rf coplanar probes for accurate on-wafer characterization, and troubleshoot and utilize coplanar probes and test fixtures to extend their lifetime. Moreover, the book shows you how to build Rf test systems for noise, high-power, and thermal testing, and de-embed the test system's parasitic effects to get the die's Rf performance. This timely resource defines the essential elements in an Rf system, explains where errors can be found in such a system, and shows how to mathematically remove them with calibration. It discusses the construction of both coplanar and high-volume testing membrane probes. The book details how to use coplanar probes to characterize individual die on the wafer, describes three popular Rf test systems, and concludes with an explanation of how to characterize packages.

From reader reviews:

Connie Griffin:

Why don't make it to be your habit? Right now, try to prepare your time to do the important action, like looking for your favorite e-book and reading a e-book. Beside you can solve your short lived problem; you can add your knowledge by the e-book entitled RF Measurements of Die and Packages (Artech House Microwave Library (Hardcover)). Try to make book RF Measurements of Die and Packages (Artech House Microwave Library (Hardcover)) as your friend. It means that it can to get your friend when you sense alone and beside regarding course make you smarter than ever. Yeah, it is very fortunated for yourself. The book makes you a lot more confidence because you can know everything by the book. So , let us make new experience and knowledge with this book.

Byron Sierra:

This RF Measurements of Die and Packages (Artech House Microwave Library (Hardcover)) tend to be reliable for you who want to be considered a successful person, why. The main reason of this RF Measurements of Die and Packages (Artech House Microwave Library (Hardcover)) can be on the list of great books you must have is actually giving you more than just simple examining food but feed you actually with information that maybe will shock your prior knowledge. This book is handy, you can bring it just about everywhere and whenever your conditions both in e-book and printed versions. Beside that this RF Measurements of Die and Packages (Artech House Microwave Library (Hardcover)) forcing you to have an enormous of experience like rich vocabulary, giving you trial of critical thinking that could it useful in your day action. So , let's have it and enjoy reading.

Marilyn Apperson:

Don't be worry when you are afraid that this book will filled the space in your house, you could have it in e-book method, more simple and reachable. This RF Measurements of Die and Packages (Artech House Microwave Library (Hardcover)) can give you a lot of close friends because by you investigating this one book you have factor that they don't and make anyone more like an interesting person. This specific book can be one of one step for you to get success. This guide offer you information that perhaps your friend doesn't understand, by knowing more than various other make you to be great persons. So , why hesitate? Let's have RF Measurements of Die and Packages (Artech House Microwave Library (Hardcover)).

Pearl Minjares:

As a pupil exactly feel bored in order to reading. If their teacher inquired them to go to the library as well as to make summary for some publication, they are complained. Just little students that has reading's heart and soul or real their hobby. They just do what the teacher want, like asked to the library. They go to at this time there but nothing reading very seriously. Any students feel that reading is not important, boring and also can't see colorful pics on there. Yeah, it is to become complicated. Book is very important for you. As we

know that on this era, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore , this RF Measurements of Die and Packages (Artech House Microwave Library (Hardcover)) can make you feel more interested to read.
