The petroleum industry in general has been dominated by engineers and production specialists. The upstream segment of the industry is dominated by drilling/completion engineers. Usually, neither of those disciplines have a great deal of training in the chemistry aspects of drilling and completing a well prior to its going on production. The chemistry of drilling fluids and completion fluids have a profound effect on the success of a well. For example, historically the drilling fluid costs to drill a well have averaged around 7% of the overall cost of the well, before completion. The successful delivery of up to 100% of that wellbore, in many cases may be attributable to the fluid used.

Considered the "bible" of the industry, *Composition and Properties of Drilling and Completion Fluids*, first written by Walter Rogers in 1948, and updated on a regular basis thereafter, is a key tool to achieving successful delivery of the wellbore.

In its Sixth Edition, *Composition and Properties of Drilling and Completion Fluids* has been updated and revised to incorporate new information on technology, economic, and political issues that have impacted the use of fluids to drill and complete oil and gas wells. With updated content on Completion Fluids and Reservoir Drilling Fluids, Health, Safety & Environment, Drilling Fluid Systems and Products, new fluid systems and additives from both chemical and engineering perspectives, Wellbore Stability, adding the new R&D on water-based muds, and with increased content on Equipment and Procedures for Evaluating Drilling Fluid Performance in light of the advent of digital technology and better manufacturing techniques, *Composition and Properties of Drilling and Completion Fluids* has been thoroughly updated to meet the drilling and completion engineer's needs.

- Explains a myriad of new products and fluid systems
- Cover the newest API/SI standards
- New R&D on water-based muds
- New emphases on Health, Safety & Environment
- New Chapter on waste management and disposal

### **From reader reviews:**

#### **Nancy Smith:**

The book Composition and Properties of Drilling and Completion Fluids can give more knowledge and also the precise product information about everything you want. Exactly why must we leave a very important thing like a book Composition and Properties of Drilling and Completion Fluids? Some of you have a different opinion about e-book. But one aim this book can give many information for us. It is absolutely suitable. Right now, try to closer with the book. Knowledge or info that you take for that, it is possible to give for each other; you may share all of these. Book Composition and Properties of Drilling and Completion Fluids has simple shape but you know: it has great and large function for you. You can seem the enormous world by available and read a e-book. So it is very wonderful.

#### **Eric Valentine:**

The e-book untitled Composition and Properties of Drilling and Completion Fluids is the guide that recommended to you to read. You can see the quality of the reserve content that will be shown to an individual. The language that creator use to explained their way of doing something is easily to understand. The article author was did a lot of analysis when write the book, and so the information that they share to you is absolutely accurate. You also will get the e-book of Composition and Properties of Drilling and Completion Fluids from the publisher to make you more enjoy free time.

#### **Loretta Pena:**

A lot of book has printed but it is different. You can get it by internet on social media. You can choose the top book for you, science, witty, novel, or whatever simply by searching from it. It is identified as of book Composition and Properties of Drilling and Completion Fluids. Contain your knowledge by it. Without leaving the printed book, it might add your knowledge and make you happier to read. It is most significant that, you must aware about guide. It can bring you from one destination for a other place.

#### **Ruth Paiz:**

What is your hobby? Have you heard in which question when you got students? We believe that that question was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. So you know that little person just like reading or as looking at become their hobby. You need to know that reading is very important along with book as to be the issue. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You find good news or update about something by book. A substantial number of sorts of books that can you take to be your object. One of them is actually Composition and Properties of Drilling and Completion Fluids.
