Applied Optics and Optical Design, Part One: 001 (Dover Books on Physics)

A. E. Conrady

Applied Optics and Optical Design, Part One: 001 (Dover Books on Physics) A. E. Conrady

"For the optical engineer it is an indispensable work." — *Journal, Optical Society of America*

"As a practical guide this book has no rival." — *Transactions, Optical Society*

"A noteworthy contribution," — *Nature* (London)

Part I covers all ordinary ray-tracing methods, together with the complete theory of primary aberrations and as much of higher aberration as is needed for the design of telescopes, low-power microscopes and simple optical systems. Chapters: Fundamental Equations, Spherical Aberration, Physical Aspect of Optical Images, Chromatic Aberration, Design of Achromatic Object-Glasses, The Optical Sine Theorem, Trigonometric Tracing of Oblique Pencils, General Theory of Perfect Optical Systems, and Ordinary Eyepieces.

Part II extends the coverage to the systematic study and design of practically all types of optical systems, with special attention to high-power microscope objectives and anastigmatic photographic objectives. Edited and completed from the author's manuscript by Rudolf Kingslake, Director of Optical Design, Eastman Kodak Company. Chapters: Additional Solutions by the Thin-Lens Method, Optical Path Differences, Optical Path Differences at an Axial Image Point, Optical Tolerances, Chromatic Aberration as an Optical Path Difference, The Matching Principle and the Design of Microscope Objectives, Primary Aberrations of Oblique Pencils, Analytical Solutions for Simple Systems with Remote Stop, Symmetrical Photographic Objectives, and Unsymmetrical Photographic Objectives.

From reader reviews:

Alma Hillyer:

The knowledge that you get from Applied Optics and Optical Design, Part One: 001 (Dover Books on Physics) is the more deep you rooting the information that hide inside the words the more you get considering reading it. It does not mean that this book is hard to comprehend but Applied Optics and Optical Design, Part One: 001 (Dover Books on Physics) giving you enjoyment feeling of reading. The copy writer conveys their point in specific way that can be understood by simply anyone who read this because the author of this book is well-known enough. This particular book also makes your own personal vocabulary increase well. Therefore it is easy to understand then can go along with you, both in printed or e-book style are available. We propose you for having this specific Applied Optics and Optical Design, Part One: 001 (Dover Books on Physics) instantly.

Eva Pham:

The particular book Applied Optics and Optical Design, Part One: 001 (Dover Books on Physics) will bring you to definitely the new experience of reading some sort of book. The author style to clarify the idea is very unique. When you try to find new book you just read, this book very suitable to you. The book Applied Optics and Optical Design, Part One: 001 (Dover Books on Physics) is much recommended to you to study. You can also get the e-book in the official web site, so you can quicker to read the book.

Dora Champagne:

Applied Optics and Optical Design, Part One: 001 (Dover Books on Physics) can be one of your beginner books that are good idea. We all recommend that straight away because this book has good vocabulary that can increase your knowledge in words, easy to understand, bit entertaining but delivering the information. The copy writer giving his/her effort to set every word into enjoyment arrangement in writing Applied Optics and Optical Design, Part One: 001 (Dover Books on Physics) however doesn't forget the main stage, giving the reader the hottest and also based confirm resource facts that maybe you can be one among it. This great information can certainly drawn you into fresh stage of crucial thinking.

Chester Hassel:

Book is one of source of information. We can add our expertise from it. Not only for students but also native or citizen will need book to know the revise information of year to be able to year. As we know those ebooks have many advantages. Beside most of us add our knowledge, could also bring us to around the world. From the book Applied Optics and Optical Design, Part One: 001 (Dover Books on Physics) we can have more advantage. Don't that you be creative people? To become creative person must prefer to read a book. Only choose the best book that ideal with your aim. Don't become doubt to change your life at this book Applied Optics and Optical Design, Part One: 001 (Dover Books on Physics). You can more appealing than now.
