El Diseño Asistido por Ordenador (DAO), más conocido por sus siglas en inglés CAD (Computer Aided Design), es el uso de un amplio rango de herramientas computacionales que ingenieros, arquitectos y otros profesionales del diseño utilizan en el desarrollo de su trabajo.

Estas herramientas se pueden dividir básicamente en programas de dibujo de dos dimensiones (2D) y modeladores en tres dimensiones (3D). Las herramientas 2D se basan en entidades vectoriales, como puntos y líneas, que se operan a través de una interfaz gráfica. Los modeladores 3D añaden superficies y sólidos. A través de este curso el alumno aprende a instalar y manejar la herramienta a lo largo de las siguientes unidades: el entorno de trabajo en AutoCAD, administración de los dibujos, precisión en el dibujo, herramientas avanzadas de precisión, operaciones básicas de dibujo y de edición, operaciones generales de edición, propiedades de los objetos, otros métodos de edición, selección y consulta.
