Mexico in Transition (Globalization and the Semi-Periphery)

Mexico in Transition provides a wide-ranging, empirical and up-to-date survey of the multiple impacts neoliberal policies have had in practice in Mexico over twenty years, and the specific impacts of the NAFTA Agreement. The volume covers a wide terrain, including the effects of globalization on peasants; the impact of neoliberalism on wages, trade unions, and specifically women workers; the emergence of new social movements El Barzón and the Zapatistas (EZLN); how the environment, especially biodiversity, has become a target for colonization by transnational corporations; the political issue of migration to the United States; and the complicated intersections of economic and political liberalization.
