## Strategies and Technologies for Healthcare Information: Theory into Practice (Health Informatics)

Changes in health care are at a breakneck pace. Regardless of the many changes we have collectively experienced, delivering health care has been, is, and will continue to be an enormously information-intensive process. Whether caring for a patient or a population, whether managing a clinic or a continuum, we are in a knowledge exchange business. A major task for our industry, and the task for chief information officers (CIOs), is to find and apply improved strategies and technologies for managing healthcare information. In a fiercely competitive healthcare marketplace, the pressures to succeed in this undertaking-and the rewards associated with success-are enormous. While the task is still daunting, we can all be encouraged by progress being made in information management. There are documented successes throughout health care, and there is growing recognition by healthcare chief executive officers and boards that information strategies, and their deployment, are essential to organizational efficiency, quite possibly organizational survival.
