## Annual Plant Reviews, Senescence Processes in Plants: Volume 26

The scientific and economic significance of plant senescence means that much effort has been made to understand the processes involved and to devise means of manipulating them agriculturally. During the past few years there has been considerable progress in this regard, especially in the molecular, genetic and genomic aspects. Senescence has a tremendous impact on agriculture. For example, leaf senescence limits crop yield and biomass production, and contributes substantially to postharvest loss in vegetable and ornamental crops during transportation, storage and on shelves. In addition, proteins, antioxidants and other nutritional compounds are degraded during senescence. Senescing tissues also become more susceptible to pathogen infection, and some of the pathogens may produce toxins, rendering food unsafe. Mitotic senescence may also determine sizes of leaves, fruits and whole plants.

This volume summarizes recent progresses in the physiology, biochemistry, cell biology, molecular biology, genomics, proteomics, and biotechnology of plant senescence. Beginning with a chapter on senescence-related terminology and our current knowledge of mitotic senescence in plants (a less well-studied area), the book focuses on post-mitotic senescence, and includes chapters addressing the senescence of leaves, flowers and fruits. Later chapters examine the development of various new biotechnologies for manipulating the senescence processes of fruit and leaves, some of which are approaching commercialization. The book is directed at researchers and professionals in plant molecular genetics, physiology and biochemistry.

### **From reader reviews:**

#### **Crystal McMullen:**

The feeling that you get from Annual Plant Reviews, Senescence Processes in Plants: Volume 26 is the more deep you excavating the information that hide inside the words the more you get interested in reading it. It does not mean that this book is hard to know but Annual Plant Reviews, Senescence Processes in Plants: Volume 26 giving you joy feeling of reading. The article author conveys their point in certain way that can be understood simply by anyone who read the item because the author of this reserve is well-known enough. This specific book also makes your vocabulary increase well. Therefore it is easy to understand then can go together with you, both in printed or e-book style are available. We propose you for having that Annual Plant Reviews, Senescence Processes in Plants: Volume 26 instantly.

#### **Walter Gagne:**

This book untitled Annual Plant Reviews, Senescence Processes in Plants: Volume 26 to be one of several books which best seller in this year, honestly, that is because when you read this guide you can get a lot of benefit on it. You will easily to buy that book in the book store or you can order it through online. The publisher on this book sells the e-book too. It makes you more easily to read this book, because you can read this book in your Smart phone. So there is no reason for you to past this guide from your list.

#### **Thelma Atkins:**

Spent a free a chance to be fun activity to perform! A lot of people spent their leisure time with their family, or their very own friends. Usually they accomplishing activity like watching television, gonna beach, or picnic inside the park. They actually doing same thing every week. Do you feel it? Do you wish to something different to fill your current free time/ holiday? Can be reading a book could be option to fill your free of charge time/ holiday. The first thing that you'll ask may be what kinds of reserve that you should read. If you want to attempt look for book, may be the book untitled Annual Plant Reviews, Senescence Processes in Plants: Volume 26 can be fine book to read. May be it may be best activity to you.

#### **Sharon Works:**

That e-book can make you to feel relax. This specific book Annual Plant Reviews, Senescence Processes in Plants: Volume 26 was multi-colored and of course has pictures on there. As we know that book Annual Plant Reviews, Senescence Processes in Plants: Volume 26 has many kinds or style. Start from kids until young adults. For example Naruto or Private eye Conan you can read and feel that you are the character on there. Therefore not at all of book are usually make you bored, any it offers up you feel happy, fun and loosen up. Try to choose the best book to suit your needs and try to like reading that will.
