Cognitive Biology: Dealing with Information from Bacteria to Minds Gennaro Auletta

Providing a new conceptual scaffold for further research in biology and cognition, this book introduces the new field of Cognitive Biology: a systems biology approach showing that further progress in this field will depend on a deep recognition of developmental processes, as well as on the consideration of the developed organism as an agent able to modify and control its surrounding environment. The role of cognition, the means through which the organism is able to

cope with its environment, cannot be underestimated. In particular, it is shown that this activity is grounded on a theory of information based on Bayesian probabilities. The organism is considered as a cybernetic system able to integrate a processor as a source of variety (the genetic system), a

regulator of its own homeostasis (the metabolic system), and a selecting system separating the self from the non-self (the membrane in unicellular organisms). Any organism is a complex system that can survive only if it is able to maintain its internal order against the spontaneous tendency towards disruption. Therefore, it is forced to monitor and control its environment and so to establish feedback circuits resulting in co-adaptation. Cognitive and biological processes are shown to be inseparable.

From reader reviews:

Mark Frey:

This Cognitive Biology: Dealing with Information from Bacteria to Minds are reliable for you who want to be described as a successful person, why. The key reason why of this Cognitive Biology: Dealing with Information from Bacteria to Minds can be one of the great books you must have will be giving you more than just simple reading food but feed an individual with information that probably will shock your preceding knowledge. This book is definitely handy, you can bring it all over the place and whenever your conditions at e-book and printed kinds. Beside that this Cognitive Biology: Dealing with Information from Bacteria to Minds giving you an enormous of experience like rich vocabulary, giving you trial of critical thinking that we know it useful in your day exercise. So, let's have it and enjoy reading.

May Chapa:

Do you have something that you enjoy such as book? The publication lovers usually prefer to choose book like comic, short story and the biggest you are novel. Now, why not striving Cognitive Biology: Dealing with Information from Bacteria to Minds that give your fun preference will be satisfied by simply reading this book. Reading behavior all over the world can be said as the means for people to know world much better then how they react when it comes to the world. It can't be explained constantly that reading habit only for the geeky individual but for all of you who wants to be success person. So, for all you who want to start looking at as your good habit, you may pick Cognitive Biology: Dealing with Information from Bacteria to Minds become your starter.

Earl Quintana:

Is it anyone who having spare time after that spend it whole day through watching television programs or just lying down on the bed? Do you need something new? This Cognitive Biology: Dealing with Information from Bacteria to Minds can be the response, oh how comes? A book you know. You are thus out of date, spending your extra time by reading in this new era is common not a geek activity. So what these guides have than the others?

Christina Bales:

As a pupil exactly feel bored for you to reading. If their teacher questioned them to go to the library or to make summary for some e-book, they are complained. Just small students that has reading's heart and soul or real their hobby. They just do what the instructor want, like asked to the library. They go to presently there but nothing reading significantly. Any students feel that reading through is not important, boring as well as can't see colorful images on there. Yeah, it is to become complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever we would like. Likewise word says, many ways to reach Chinese's country. So, this Cognitive Biology: Dealing with Information from Bacteria to Minds can make you sense more interested to read.
