Laparoscopic Techniques in Uro-Oncology Bertrand Guillonneau, Inderbir S. Gill, Guenter Janetschek, Ingolf A. Türk

The book covers all techniques involved in uro-oncology which are widely accepted, well established, safe, standardized, reproducible, and teachable. The aim is not to divide the oncology into two worlds (open surgery versus laparoscopy), but to enlarge the technical proposals, with the same common goal. The book contains black and white drawings only as these are generally more precise and give a clearer understanding. The book is essential reading for all urologists interested in laparoscopy as well as urologists in training (residents) or doing a fellowship in Oncology or Minimally Invasive Surgery.
