Rice Policy in Indonesia (Food Systems & Agrarian Change) Scott R. Pearson, Walter Falcon, Paul Heytens, Eric A. Monke, Rosamun Naylor

This book examines the components of Indonesia's rice policy to help policymakers, analysts, and observers sort out the pros and cons of alternative courses of action. Containing the results of the Food Research Institute's third multiyear research project on Indonesian food policy, the book combines new field-based empirical evidence on rice farming profitability and rural employment and wages with long experience in analyzing Indonesian food policy issues and the international market for rice.
