**The Chinese Particle Le: Discourse Construction and Pragmatic Marking in Chinese (Routledge Studies in Asian Linguistics)** M.E. van den Berg, G. Wu

Ever since the start of Chinese linguistic studies, the description of the Chinese particle LE has remained elusive. The classification has evolved from a listing of sentences and the discussion of contrastive pairs to a more context and discourse-oriented analysis. The development in recent years of inferential models and situation semantics has opened the way for a renewed study of the use of the Chinese particle LE. This book discusses the Chinese data from a 'mental space' perspective and finally reveals the role so-called Chinese 'sentence LE' plays in the construction and maintenance of discourse.
