Green Tribology: Biomimetics, Energy Conservation and Sustainability (Green Energy and Technology)

Green Tribology: Biomimetics, Energy Conservation and Sustainability (Green Energy and Technology)

Tribology is the study of friction, wear and lubrication. Recently, the concept of “green tribology” as “the science and technology of the tribological aspects of ecological balance and of environmental and biological impacts” was introduced. The field of green tribology includes tribological technology that mimics living nature (biomimetic surfaces) and thus is expected to be environmentally friendly, the control of friction and wear that is of importance for energy conservation and conversion, environmental aspects of lubrication and surface modification techniques, and tribological aspects of green applications such as wind-power turbines or solar panels. This book is the first comprehensive volume on green tribology. The chapters are prepared by leading experts in their fields and cover such topics as biomimetics, environmentally friendly lubrication, tribology of wind turbines and renewable sources of energy, and ecological impact of new technologies of surface treatment.

From reader reviews:

Herman Ovalle:

Within other case, little people like to read book Green Tribology: Biomimetics, Energy Conservation and Sustainability (Green Energy and Technology). You can choose the best book if you want reading a book. Providing we know about how is important some sort of book Green Tribology: Biomimetics, Energy Conservation and Sustainability (Green Energy and Technology). You can add information and of course you can around the world by way of a book. Absolutely right, since from book you can recognize everything! From your country right up until foreign or abroad you will be known. About simple issue until wonderful thing you may know that. In this era, we can open a book or maybe searching by internet device. It is called e-book. You need to use it when you feel bored to go to the library. Let's go through.

Jackie Caldwell:

The book Green Tribology: Biomimetics, Energy Conservation and Sustainability (Green Energy and Technology) has a lot details on it. So when you read this book you can get a lot of profit. The book was written by the very famous author. Tom makes some research ahead of write this book. This book very easy to read you can find the point easily after perusing this book.

Julie Moore:

Reading can called thoughts hangout, why? Because while you are reading a book particularly book entitled Green Tribology: Biomimetics, Energy Conservation and Sustainability (Green Energy and Technology) your mind will drift away trough every dimension, wandering in most aspect that maybe unidentified for but surely might be your mind friends. Imaging every word written in a book then become one application form conclusion and explanation which maybe you never get just before. The Green Tribology: Biomimetics, Energy Conservation and Sustainability (Green Energy and Technology) giving you another experience more than blown away your mind but also giving you useful data for your better life with this era. So now let us explain to you the relaxing pattern here is your body and mind will probably be pleased when you are finished looking at it, like winning a. Do you want to try this extraordinary paying spare time activity?

Jesica Simon:

Reading a reserve make you to get more knowledge from it. You can take knowledge and information coming from a book. Book is written or printed or descriptive from each source this filled update of news. With this modern era like right now, many ways to get information are available for you. From media social similar to newspaper, magazines, science publication, encyclopedia, reference book, novel and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just in search of the Green Tribology: Biomimetics, Energy Conservation and Sustainability (Green Energy and Technology) when you necessary it?
