Visualizing Time: Designing Graphical Representations for Statistical Data (Statistics and Computing)

Graham Wills

Art, or Science? Which of these is the right way to think of the field of visualization? This is not an easy question to answer, even for those who have many years experience in making graphical depictions of data with a view to help people understand it and take action. In this book, Graham Wills bridges the gap between the art and the science of visually representing data. He does not simply give rules and advice, but bases these on general principles and provide a clear path between them

This book is concerned with the graphical representation of time data and is written to cover a range of different users. A visualization expert designing tools for displaying time will find it valuable, but so also should a financier assembling a report in a spreadsheet, or a medical researcher trying to display gene sequences using a commercial statistical package.

From reader reviews:

Jerry Osbourne:

Reading a guide can be one of a lot of pastime that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people enjoy it. First reading a e-book will give you a lot of new data. When you read a book you will get new information since book is one of several ways to share the information or even their idea. Second, studying a book will make anyone more imaginative. When you reading through a book especially tale fantasy book the author will bring you to definitely imagine the story how the people do it anything. Third, you could share your knowledge to some others. When you read this Visualizing Time: Designing Graphical Representations for Statistical Data (Statistics and Computing), you can tells your family, friends and soon about yours guide. Your knowledge can inspire different ones, make them reading a book.

Christina Mundell:

Reading a book being new life style in this yr; every people loves to study a book. When you read a book you can get a great deal of benefit. When you read books, you can improve your knowledge, because book has a lot of information upon it. The information that you will get depend on what sorts of book that you have read. If you wish to get information about your study, you can read education books, but if you want to entertain yourself look for a fiction books, this kind of us novel, comics, and also soon. The Visualizing Time: Designing Graphical Representations for Statistical Data (Statistics and Computing) offer you a new experience in reading through a book.

Timothy Austin:

Is it an individual who having spare time in that case spend it whole day by simply watching television programs or just telling lies on the bed? Do you need something totally new? This Visualizing Time: Designing Graphical Representations for Statistical Data (Statistics and Computing) can be the reply, oh how comes? A fresh book you know. You are therefore out of date, spending your spare time by reading in this new era is common not a geek activity. So what these publications have than the others?

Kristine Toomey:

As a student exactly feel bored to reading. If their teacher questioned them to go to the library or to make summary for some reserve, they are complained. Just very little students that has reading's heart or real their leisure activity. They just do what the instructor want, like asked to go to the library. They go to generally there but nothing reading seriously. Any students feel that looking at is not important, boring and also can't see colorful photographs on there. Yeah, it is for being complicated. Book is very important for you. As we know that on this age, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. Therefore , this Visualizing Time: Designing Graphical Representations for Statistical Data (Statistics and Computing) can make you sense more interested to read.
