By arranging frequently used characters under the phonetic element they have in common, rather than only under their radical, the *Dictionary* encourages the student to link characters according to their phonetic. The system of cross-referencing then allows the student to find easily all the characters in the dictionary which have the same phonetic element, thus helping to fix in the memory the link between a character and its sound and meaning.

This innovative resource will be an excellent study-aid for students with a basic grasp of Chinese, whether they are studying with a teacher or learning on their own.
