Applied Diffusion Processes from Engineering to Finance (ISTE) Jacques Janssen, Oronzio Manca, Raimondo Manca

The aim of this book is to promote interaction between engineering, finance and insurance, as these three domains have many models and methods of solution in common for solving real-life problems. The authors point out the strict inter-relations that exist among the diffusion models used in engineering, finance and insurance. In each of the three fields, the basic diffusion models are presented and their strong similarities are discussed. Analytical, numerical and Monte Carlo simulation methods are explained with a view to applying them to obtain the solutions to the different problems presented in the book. Advanced topics such as nonlinear problems, Lévy processes and semi-Markov models in interactions with the diffusion models are discussed, as well as possible future interactions among engineering, finance and insurance.

Contents

1. Diffusion Phenomena and Models.
2. Probabilistic Models of Diffusion Processes.
3. Solving Partial Differential Equations of Second Order.
4. Problems in Finance.
5. Basic PDE in Finance.
6. Exotic and American Options Pricing Theory.
7. Hitting Times for Diffusion Processes and Stochastic Models in Insurance.
8. Numerical Methods.
9. Advanced Topics in Engineering: Nonlinear Models.
10. Lévy Processes.
11. Advanced Topics in Insurance: Copula Models and VaR Techniques.
12. Advanced Topics in Finance: Semi-Markov Models.
13. Monte Carlo Semi-Markov Simulation Methods.

About the Authors

Jacques Janssen is now Honorary Professor at the Solvay Business School (ULB) in Brussels, Belgium, having previously taught at EURIA (Euro-Institut d'Actuariat, University of West Brittany, Brest, France) and Télécom-Bretagne (Brest, France) as well as being a director of Jacan Insurance and Finance Services, a consultancy and training company.

Oronzio Manca is Professor of thermal sciences at Seconda Università degli Studi di Napoli in Italy. He is currently Associate Editor of ASME Journal of Heat Transfer and Journal of Porous Media and a member of the editorial advisory boards for The Open Thermodynamics Journal, Advances in Mechanical Engineering, The Open Fuels & Energy Science Journal.

Raimondo Manca is Professor of mathematical methods applied to economics, finance and actuarial science at University of Rome "La Sapienza" in Italy. He is associate editor for the journal Methodology and Computing in Applied Probability. His main research interests are multidimensional linear algebra, computational probability, application of stochastic processes to economics, finance and insurance and simulation models.

From reader reviews:

Rosemarie Pickett:

What do you ponder on book? It is just for students since they are still students or that for all people in the world, what the best subject for that? Just you can be answered for that concern above. Every person has several personality and hobby for every single other. Don't to be obligated someone or something that they don't need do that. You must know how great in addition to important the book Applied Diffusion Processes from Engineering to Finance (ISTE). All type of book would you see on many resources. You can look for the internet solutions or other social media.

Bessie Hall:

Do you one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Make an effort to pick one book that you never know the inside because don't assess book by its protect may doesn't work at this point is difficult job because you are afraid that the inside maybe not seeing that fantastic as in the outside search likes. Maybe you answer is usually Applied Diffusion Processes from Engineering to Finance (ISTE) why because the wonderful cover that make you consider in regards to the content will not disappoint a person. The inside or content is definitely fantastic as the outside or even cover. Your reading sixth sense will directly show you to pick up this book.

Susan Belcher:

Beside this kind of Applied Diffusion Processes from Engineering to Finance (ISTE) in your phone, it could give you a way to get more close to the new knowledge or facts. The information and the knowledge you may got here is fresh from your oven so don't be worry if you feel like an aged people live in narrow town. It is good thing to have Applied Diffusion Processes from Engineering to Finance (ISTE) because this book offers for you readable information. Do you oftentimes have book but you would not get what it's interesting features of. Oh come on, that will not end up to happen if you have this within your hand. The Enjoyable option here cannot be questionable, like treasuring beautiful island. Techniques you still want to miss the item? Find this book and read it from right now!

Ralph Smith:

Don't be worry if you are afraid that this book can filled the space in your house, you could have it in e-book way, more simple and reachable. This kind of Applied Diffusion Processes from Engineering to Finance (ISTE) can give you a lot of buddies because by you taking a look at this one book you have point that they don't and make you more like an interesting person. That book can be one of a step for you to get success. This guide offer you information that maybe your friend doesn't realize, by knowing more than additional make you to be great individuals. So , why hesitate? We need to have Applied Diffusion Processes from Engineering to Finance (ISTE).
