FISH MANAGEMENT AND AQUATIC ENVIRONMENT Professor (Dr.) Arvind Kumar, Partha Bandyopadhyay, A. Madhusudhan Rao, P.K. Sukumaran, S.S. Yeragi

Fishes are the most primitive vertebrates from which all other vertebrates including man has evolved. They are adapted to aquatic life with gills to breathe and fins to move about, although a few species can move on land and breathe air. They show a great diversity of form, habitat and are adapted to a wide range of environment. Human race has been associated with fish life from time immemorial. In the field of fisheries, conservation and utilization of fish is important as fish is major food source harvested from natural populations. Due to population explosion, high degree of pollution, urbanization, industrialization and indiscriminate use of chemical fertilizer and pesticides in agriculture, fish biodiversity is losing at an alarming rate. Hence, fish management is the prime need of the time. The Present book entitled "Fish Management and Aquatic Environment" is the compilation of some most recent research articles of eminent scientists from different parts of the country. With its application-oriented approach, the book would be immensely useful to everyone dealing with aquacultural science, such as University teachers, farmers, academics, technocrats, politicians, researchers and post-graduate students as well.

About The Author

Dr. Arvind Kumar is Vice-Chancellor of Magadh University and had been Vice-Chancellor of Vinoba Bhave University. Dr. Kumar is recipient of several awards and medals including Prof. WA Nizami and Dr. SZ Qasim Gold Medals.
