# Managing the Transition to a Low-Carbon Economy: Perspectives, Policies, and Practices from Asia

## **Managing the Transition to a Low-Carbon Economy: Perspectives, Policies, and Practices from Asia**

Asia must be at the center of the global fight against climate change. It is the world's most populous region, with high economic growth, a rising share of global greenhouse gas emissions, and the most vulnerability to climate risks. Its current resource- and emission-intensive growth pattern is not sustainable. This study recognizes low-carbon green growth as an imperative—not an option—for developing Asia.

Asia has already started to move toward low-carbon green growth. Many emerging economies have started to use sustainable development to bring competitiveness to their industries and to serve growing green technology markets.

The aim of this study is to share the experiences of emerging Asian economies and the lessons learned. The book assesses the low-carbon and green policies and practices taken by Asian countries, identifies gaps, and examines new opportunities for low-carbon green growth.

#### **Richard Manning:**

As a student exactly feel bored to help reading. If their teacher asked them to go to the library as well as to make summary for some book, they are complained. Just little students that has reading's spirit or real their leisure activity. They just do what the trainer want, like asked to the library. They go to presently there but nothing reading seriously. Any students feel that looking at is not important, boring as well as can't see colorful images on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this era, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. So , this *Managing the Transition to a Low-Carbon Economy: Perspectives, Policies, and*

Practices from Asia can make you truly feel more interested to read.
