Scott Tilley, Tauhida Parveen

Software Testing in the Cloud: Migration and Execution (SpringerBriefs in Computer Science) Scott Tilley, Tauhida Parveen

For a large, complex system, the amount of test cases in a regression test suite can range from a few hundred to several thousands, which can take hours or even days to execute. Regression testing also requires considerable resources that are often not readily available. This precludes their use in an interactive setting, further contributing to an inefficient testing process.

Cloud computing offers the use of virtualized hardware, effectively unlimited storage, and software services that can help reduce the execution time of large test suites in a cost-effective manner. The research presented by Tilley and Parveen leverages the resources provided by cloud computing infrastructure to facilitate the concurrent execution of test cases. They introduce a decision framework called SMART-T to support migration of software testing to the cloud, a distributed environment called HadoopUnit for the concurrent execution of test cases in the cloud, and a series of case studies illustrating the use of the framework and the environment. Experimental results indicate a significant reduction in test execution time is possible when compared with a typical sequential environment.

Software testing in the cloud is a subject of high interest for advanced practitioners and academic researchers alike. For advanced practitioners, the issue of cloud computing and its impact on the field of software testing is becoming increasingly relevant. For academic researchers, this is a subject that is replete with interesting challenges; there are so many open problems that graduate students will be busy for years to come. To further disseminate results in this field, the authors created a community of interest called “Software Testing in the Cloud” (www.STITC.org), and they encourage all readers to get involved in this exciting new area.

From reader reviews:

Karen Lheureux:

Have you spare time for any day? What do you do when you have more or little spare time? That's why, you can choose the suitable activity to get spend your time. Any person spent their particular spare time to take a wander, shopping, or went to the particular Mall. How about open or read a book entitled Software Testing in the Cloud: Migration and Execution (SpringerBriefs in Computer Science)? Maybe it is to be best activity for you. You know beside you can spend your time with the favorite's book, you can smarter than before. Do you agree with its opinion or you have various other opinion?

Jesus Loveless:

The reason? Because this Software Testing in the Cloud: Migration and Execution (SpringerBriefs in Computer Science) is an unordinary book that the inside of the publication waiting for you to snap that but latter it will distress you with the secret the item inside. Reading this book adjacent to it was fantastic author who write the book in such awesome way makes the content within easier to understand, entertaining technique but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this anymore or you going to regret it. This unique book will give you a lot of positive aspects than the other book have such as help improving your skill and your critical thinking approach. So , still want to postpone having that book? If I ended up you I will go to the publication store hurriedly.

Barbara Robbins:

That book can make you to feel relax. This particular book Software Testing in the Cloud: Migration and Execution (SpringerBriefs in Computer Science) was colourful and of course has pictures on there. As we know that book Software Testing in the Cloud: Migration and Execution (SpringerBriefs in Computer Science) has many kinds or style. Start from kids until youngsters. For example Naruto or Detective Conan you can read and think that you are the character on there. So , not at all of book are generally make you bored, any it offers you feel happy, fun and rest. Try to choose the best book in your case and try to like reading which.

Donald Oakes:

What is your hobby? Have you heard that will question when you got pupils? We believe that that concern was given by teacher with their students. Many kinds of hobby, All people has different hobby. So you know that little person like reading or as reading become their hobby. You should know that reading is very important in addition to book as to be the thing. Book is important thing to provide you knowledge, except your own teacher or lecturer. You get good news or update with regards to something by book. Different categories of books that can you decide to try be your object. One of them are these claims Software Testing in the Cloud: Migration and Execution (SpringerBriefs in Computer Science).
